Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

This Office Action is responsive to the Amendment filed October 6, 2008. The rejection of claim 21, under 35 USC 1123 first paragraph is overcome. However, claims 1-6 and 11-16 are newly rejected as follows:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 & 11-16 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for electrically operated components, does not reasonably provide enablement for any electrically operated components capable of being included in an electric hand tool. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The specification provided enablement for electrical components set forth in drawing 1. However, the claims include ANY electrically operated component which would include for example a microchip and the specification does not have support for ANY combination of electrically operated components. .

Response to Arguments

Applicant's arguments with respect to claims 1-6 & 11-16 have been considered, they overcome the previous rejection and as such are moot in view of the new ground(s) of rejection.
